

2007 Seminar Schedule

SLEEP APNEA: THE NEW FRONTIER
FEATURING DR. KEITH THORNTON
 Developer of the TAP® family of oral appliances

3 DAY SEMINAR

The course consists of sessions and “hands-on” workshops. The basics of sleep and polysomnography will be presented. The pathophysiology of sleep disordered breathing will be reviewed and clinical aspects of sleep apnea in the dentist’s office will be outlined.

Included in the tuition is a custom fitted TAP appliance for each attendee. In their home or hotel room, five participants will have the opportunity to be tested for sleep disordered breathing using the Remmers Sleep Recorder. The experience will provide practitioners with the insight and understanding of what their patients are living through.

1 DAY SEMINAR

This is an introductory course on sleep disordered breathing which includes screening and treatment. Participants will gain hands-on experience with the Thornton Adjustable Positioner (TAP). Dentists can have a TAP® 3 appliance fabricated for themselves. As in the 3 Day Seminar, screening tools, marketing and insurance reimbursement will be covered.
